

Heavy metals and pesticides

According to our philosophy, The Juice PLUS+® Company utilises only the best ingredients available for the manufacturing of the Juice PLUS+ products. All ingredients are selected carefully and the whole production is monitored and controlled to ensure that the requirements for the raw materials are strictly observed.

This includes that during every phase of the production, high level tests are established to make sure that Juice PLUS+ corresponds the strict quality standards regarding pesticides and heavy metals.

Dr. Eberhard Grün
